

EMERGENCY PROTOCOL EP-001

1.0 PURPOSE

This protocol outlines the EMERGENCY-SHUTDOWN-PROCEDURE for the main facility.

2.0 EXECUTION

When the FIRE-ALARM is triggered, it indicates a FIRE-HAZARD.

Operators must immediately execute the EMERGENCY-SHUTDOWN-PROCEDURE.

This procedure isolates the GAS-PIPELINE and shuts off the MAIN-VALVE.

Failure to do so CAUSES a severe EXPLOSION-HAZARD.
